Origami Fish Picture

You will need

- white paper /card
- white or green paper/card for the seaweed
- Scissors
- Larger piece of white/blue paper/card to create the sea
- Coloured pens or pencils to create the eyes of the fish.
- Glue

Method

1. If using white, colour or paint the larger piece of paper/card in shades of blue to create the sea. If painted leave to dry.
2. Colour or paint the paper in green for the seaweed. If painted leave to dry.
3. If using white paper colour or paint some of these sheets. If painted when dry, these will be used to create the fish. When doing this use your imagination you could, create a rainbow design on one sheet, a spotty design on another. It's up to you
4. When all of this is dry watch the video link below and follow the simple steps to create your fish shapes using the origami technique.

   You can stop the clip while you fold your paper, if you're not sure of an instruction take the clip back to where you need to watch it again.

https://www.youtube.com/watch?v=ipsFC_GM9oc

5. When you have created your fish why not try smaller pieces of paper to create smaller fish.
6. Using the coloured pens/pencils draw some eyes onto all of your fish.

7. Cut the green paper/card into thin strips to create the seaweed. Stick this onto your blue background.
8. To finish off your design stick the fish onto the blue background creating your own amazing sea picture.
9. Add extra detail by making bubbles and adding them to your design.

Have Fun!!!
