

Milk Bottle Bird House

Your task is to make your very own birdhouse that you can put into your garden.

You will need:

- Milk Carton
- Tape
- Scissors
- Warm Water
- Washing Up Liquid
- String

Here are some finished bird houses for ideas:

Method

<p>1. First, clean out the milk carton using the warm water and the washing up liquid. Make sure that you ask an adult to check the temperature of the water first!</p>	
<p>2. Next, carefully cut a hole into the side of the milk carton.</p>	
<p>3. After that, tape around the hole so that it is not sharp for the birds who go in and out of the birdhouse.</p>	
<p>4. Then, tape a length of string onto the top of the bottle, which is to tie the birdhouse up.</p>	
<p>5. After that, you could decorate your birdhouse with coloured pens before you hang it outside.</p>
